

Active Patient Screening for Coronavirus (COVID-19)

Country Category Key:

PHE Category 1	PHE Category 2
Hubei Province (China), Iran, Italy, Daegu or Cheongdo (Republic of Korea)	Laos, Cambodia, Cambodia, Hong Kong, China (outside of Hubei province), Japan, Macau, Malaysia, Singapore, Thailand, Vietnam, Myanmar, Taiwan, Republic of Korea (except areas of the country specifically referred to in category 1), Spire only- The Philippines

If the patient is an inpatient and symptomatic;

- Place the patient in respiratory isolation (and their belongings or waste) with the door closed and call NHS111
- Do not physically examine the patient
- Ensure appropriate PPE is used
- If in OPD and consultation/examination has already started, leave the room and wash your hands - Call NHS111
- Seek specialist advice from a local microbiologist
- Notify the local PHE Health Protection Team
- Ensure appropriate decontamination is carried out on discharge
